PROFILE

Experienced Application Engineer possessing good knowledge in effectively handling development, testing, configuration, and deployment of distributed systems. Enthusiastic & eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Ability to contribute independently as well as be a team player.

RELEVANT EXPERIENCE

Junior Software Developer

Nayamsoft India Private Limited APRIL, 2022 - PRESENT

As a full-stack software developer, my role involves designing and developing web applications from end to end. I primarily work with Java in the backend and Angular in the front end. In the backend, I leverage Java to handle server side logic, database interactions, and API integrations. On the front end, I utilize Angular to create interactive user interfaces, implement client-side functionality, and ensure seamless user experiences. My responsibilities encompass coding, testing, debugging, and deploying applications while ensuring they meet the requirements and adhere to best coding practices.

PROJECT

Finmart

Description Dec,2022 - April, 2023

Finmart is a fintech application that helps people to find Bank accounts, credit cards & personal loans.

Responsibilities

- Involved in software development life cycle (SDLC) of tracking the requirements, gathering, analysis, detailed design and development.
- Responsible for developing and designing Rest APIs for all the tasks involved in the project flow.
- Used Typescript and its features such as static typing, classes and interfaces.
- Actively involved in performance improvement of the application

Tool

Spring boot, Angular 14, Typescript, Material UI, RXJS, S3 Bucket, CSS3, HTML5, Formio, Zuul , Eureka Server, Docker, Git, Gitlab.

Corban

Description April, 2022 - Nov, 2022

Corban is a Banking Notification Alert System. It is used to send alert message to the customer via SMS, WhatsApp, Email and Telegram.

Responsibilities

- Responsible for developing and designing Rest APIs for all the tasks involved in the project flow.
- Created database design and responsible for creating and modifying Database Objects.
- Collaborate with Front-end developers to integrate user-facing elements with server-side logic.

Tool

Spring Boot, Postgres, Redis, Zipkin, Apache ActiveMQ, Apache Camel, Elasticsearch, Prometheus, Grafana, Git, Docker, Jmeter.
